MARLOW-PILOT 34

SPECIFICATIONS

Length overall	39' 6"
Beam	12' 4"
Draft	2' 6"
Fuel Capacity	280 gals.
Water Capacity	105 gals.

The Marlow-Pilot 34 (MP34) is the newest model to enter the Marlow line by owner David E. Marlow. It is the result of more than 40 years of boat building experience combined with the latest engineering and technological advances to create a stronger, lighter, more fuel-efficient boat. It is the ideal vessel for cruisers wanting to participate in an active boating lifestyle with a boat that is economical and well designed.

In building the MP34, every aspect of Marlow's building process has been re-evaluated and tested. As a result, it was constructed and enhanced with a higher quality gelcoat and resin, augmenting its water resistance. Using Nida-Core coring, Marlow has designed a more structurally sound hull producing better glass to resin ratios, further enriching hull strength and integrity.

The MP34 is the second open salon build for Marlow. It has a roomy upper salon for entertaining in comfort with twin tables, as well as plenty of seating. Its helm area, just forward of the salon, has two helm seats for the captain and first mate. The engine room can be accessed by the touch of a button, which electrically raises the upper salon floor. Stepping below into its ample cabin, the port side galley is awash in natural light, room to cook, and genuine Corian® countertops. The teak cabinets and flooring create a warm, comfortable living space with a divided vanity and shower areas on the starboard side. Also on the starboard side is a dinette area with a large finished table that converts to a bunk serving as an additional sleeping cabin. Its forward cabin v-berth with an inner spring mattress and generous storage creates a true bond with her larger sister ships.

The MP34 is powered by the standard 320 hp Yanmar® diesel engine with multiple optional engine configurations available including twin 220s or 260s.

MARLOW-MAINSHIP 31

The Marlow-Mainship 31 (MM31) is the third model in the lineup of new boats built under owner David Marlow. While it is similar to previous Marlow models, a thorough inspection reveals significant quality and design changes. It also shows that every aspect of the former boat building process has been reviewed, tested, and upgraded.

Efforts to improve the MM31 began with improvements to its gelcoat and resin quality. The next improvement was adding Nida-Core, a new coring that created greater hull strength and better water resistance. Elements

like caulking and sealants have been improved. The meticulous attention to detail reflects Marlow's demand for quality over quantity in the production of a better-built boat.

The quality of the fit and finish are apparent below deck. Here Marlow-Mainship craftsmen handcrafted the teak furniture and floors. On the port side they put in a well-equipped galley that is large for a boat of this size.

Also on the port side is a seating area perfect for reading or relaxing. On the starboard side is a large bath-

room with a sink, vanity area, separate shower, and toilet. The forward cabin has a large bed on an innerspring mattress. This cabin has a large hanging locker and plenty of extra drawer and storage space.

The MM31 is powered by either the standard 180 hp Yanmar® or the optional 220 hp, 260 hp, or 315 hp Yanmar.

SPECIFICATIONS

Length overall	35'5"
Beam	10'6"
Draft	2'4"
Fuel Capacity	196 gals.
Water Capacity	90 gals.
